

Memo

To: Hunt Club Presidents and Members
From: Craig Kaderavek
Regional Director Forestland Operations
Date: May 3, 2017
Re: Property Access Rights of Mineral Operators

As a reminder:

The Heartwood Forestland Fund property on which you have a hunting license agreement is subject to activities related to timber management, natural gas development, and coal mining. From time to time you or your members may encounter representatives of various companies or interests, including employees and contractors, carrying out their work-related responsibilities within your lease boundary. We kindly ask that you recognize their rights to be on the property and treat them with all due respect.

If you encounter someone behaving in a way that suggests that they are engaged in activities that clearly aren't work related or are illegal then we ask that you please contact the game warden (VDGIF: 276-783-4860) or other appropriate law enforcement office, or the property manager.
